# SPECIAL CLEARANCE SALE

## Forest Tree Seedlings and Shrubs

The following is a list of unsold seedlings, which we are offering to the planters at this time. We can make immediate shipment of any stock offered herein. Spring is a good time to plant seedlings. You will find here some very attractive, low prices on several items that we have in quantities, which are good for reforestation purposes. We suggest that you place your order now while the stock is complete. Our shipping and digging season is now open and will last until the latter part of April, but the sooner you plant the better opportunities for seedlings growing.

### BLACK WALNUT

The Black Walnut is one of our most valuable trees. It is quite adaptable to various soils and climates and is found in almost every state in the United States.

The wood from the Black Walnut is valuable for making all kinds of furniture, also gunstocks, automobile steering wheels and numerous things. It has many good qualities, the wood is hard, heavy, moderately straight-grained and strong.

Black Walnut seedlings are easily transplanted, as they have a good root system. Some plant them about six to eight feet apart, each way, and after two or three years the ground can be used as a pasture and at the same time the trees will be developing into something valuable.

The value of the nuts is something else to think about. The kernels are being used extensively in candy making, in breads, cakes and salads and other forms of food.

Due to the fact that we have produced a large quantity of Black Walnut seedlings we are in position to sell them at very low prices. Why not take advantage of these prices, as you may not have an opportunity to get BLACK WALNUT trees again at such low prices.

### WHITE WALNUT (Juglan Cinera):

A large tree often obtaining a height of from 80 to 100 feet. A good tree for orchard planting. Nuts delicious. Hardy.

	Per 100	Per 250	Per 1000
6-12 inch.....	\$1.50	\$ 3.00	\$ 8.00
12-18 inch.....	2.50	5.00	12.00
18-24 inch.....	3.50	7.00	18.00
2-3 feet.....	5.00	10.00	30.00

### TULIP TREE OR YELLOW POPLAR (LIRIODENDRON)

The Tulip tree or Yellow Poplar is one of our most rapid growing trees.

When fully matured will reach a height from 80 feet to 100 feet. It is hardy, ornamental, of pyramidal shape, with handsome foliage and tulip-like flower. It is valuable for road-

side and park planting. It is also a good forest tree. The timber is soft, fine-grained, light yellow wood and is used quite extensively in carpentry for furniture, weatherboarding, window frames, boats, baseboards, boxes and many other uses too numerous to mention. You should plant a few thousand of these now and in ten or twelve years you can start selling the trees for a good profit.

### LIQUIDAMBER (SWEET GUM)

The Sweet Gum is a shapely pyramidal tree with slender corky-ridged branches. Leaves deeply serrated, with 5 to 7 lobes. The leaves are bright green and lustrous at maturity in autumn fading to tones of crimson and is outstanding for the brilliant colors. This is a good tree for street, highway, park and lawn planting and is a good tree to use in groups or for forest planting.

	Per 100	Per 250	Per 1000
6-12 inch.....	\$1.25	\$ 2.50	\$ 9.00
12-18 inch.....	1.75	3.50	12.00
18-24 inch.....	2.75	5.50	22.50
2-3 feet.....	3.25	6.75	25.00

## ASH (FRAXINUS)

The Ash are very handsome trees. They are valuable for street and park planting, good forest trees. The timber is valuable for making of tool handles, furniture, interior finishing of houses, baskets and for fuel. The Ash grow in almost any moderately soil, grows rapidly while young.

**FRAXINUS AMERICANA** (White Ash). Tall growing to about 80 feet, hardy.

**FRAXINUS LANCEOLATA** (Green Ash). Grows to a height of about 60 feet, hardy.

	Per 100	Per 250	Per 1000
6-12 inch.....	\$ .60	\$ 1.20	\$ 4.00
12-18 inch.....	.80	1.60	6.00
